DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2,9-10 and 17-18 are drawn to a price fluctuating predicting device, corresponding method, and corresponding program, classified in class 705.
 - II. Claims 3, 11, and 19 are drawn to a price fluctuating predicting device, corresponding method, and corresponding program classified in class 705.
 - III. Claims 4-6,12-14, and 20-22, drawn to a price fluctuating warning device, corresponding method, and corresponding program classified in class 705.
 - IV. Claims 7-8,15-16, and 23-24 drawn to a price fluctuating warning device, classified in class705.
 - V. Claims 25-30, drawn to a fluctuating predicting device, classified in class 705.
2. Inventions I and II and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as defined in the limitations of claim 1, invention V has separate utility as defined in the limitations of claims 25. See MPEP § 806.05(d).

Art Unit: 3624

3. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility as defined in the limitation of claims 3. See MPEP § 806.05(d).

4. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III restriction for examination purposes as indicated is proper.
